

## Fiber Laser Marking Machine Model : LM-D Series

### Description

LM-D series fiber laser marking machine can process most metal and nonmetal materials, metal: stainless steel, carbon steel, alloy steel, spring steel, copper plate, aluminum plate, gold, silver, titanium, ring and other plate products. Nonmetal: painting acrylic, density board, plastic, acrylic acid, rubber, bamboo, marble, painting glass, TPU(Thermoplastic polyurethanes) Desk Table Fiber Marking Machine uses in electronic components, integrated circuits (IC), electrical appliances, and other industries.

### Production Advantages

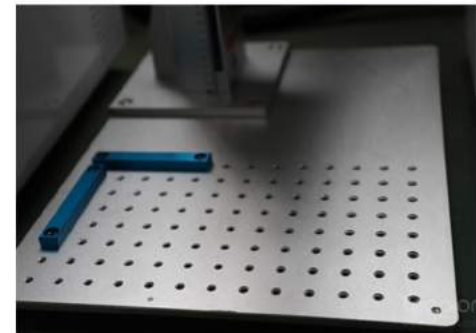

#### Control System

EZCAD software

#### Field Lens

best quality

#### Working Table

Standard working size is 110\*110 mm  
Optional working size is 200\*200/300\*300mm

## Marking Colorful (Optional)

### JPT Laser

One of the best laser source in the world ,  
Max laser from China.
